WHO ARE WE?

About Us

We enhance the fertility of the soil, which forms the basis of agricultural production, and alleviate the challenges faced by farmers. As a key player in the agricultural sector in Konya, our mission is to increase soil fertility and promote sustainable farming practices.

With our technology-focused approach, we provide solutions tailored to the needs of modern agriculture. Our innovative fertilization and spraying machines help farmers increase productivity and utilize their resources more efficiently while aiming to minimize environmental impact.

Driven by a commitment to customer satisfaction, we strive to produce our products with the highest standards of quality and reliability. Our expert team supports every stage of agricultural production by keeping up with the latest developments in the industry and offering solutions tailored to our customers' needs.

More than just a machinery manufacturer, we are committed to the future of agriculture by promoting sustainable farming practices and enhancing soil fertility. We do our utmost to contribute to the success of our farmers and to global food security.

As the Üntar family, we add abundance to the soil, look confidently toward the future of agriculture, and continue to stand by our farmers.
